

IP Fax Messaging For Exchange

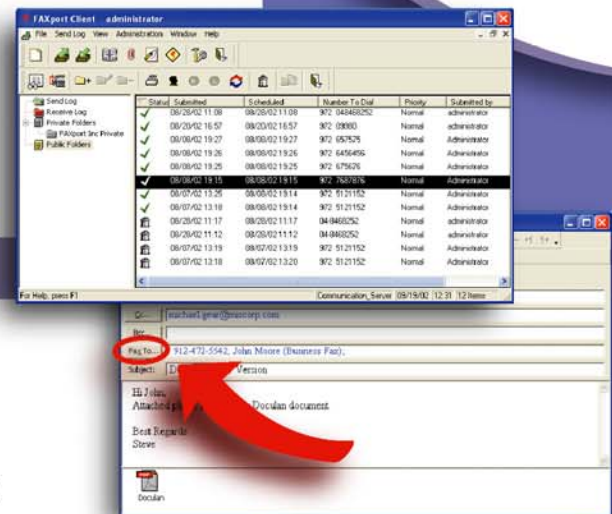

2003 – new technology

FAXport IP Fax Messaging software allows users from their desktop and anywhere on the network—to prepare, preview, send, and receive faxes.

FAXport is a feature-rich technology that provides economical network faxing capabilities and improved productivity.

Through integrating FAXport with Microsoft Exchange e-mail server, FAXport becomes a part of everyday activities. FAXport is a feature rich technology that provides economical network faxing capabilities and improved productivity, eliminating the need for dedicated fax machines and phone lines. FAXport's Exchange 2003 Connector supports all versions of Microsoft Exchange servers.

FAXport Benefits the User Tremendously

Sending a fax is as easy as sending e-mail

No need for user training. To send a fax from Outlook, the user needs to enter a plain fax number in the "To" field, or choose a fax number from the address book - no need to enter special signs with the fax number. Same message can be sent simultaneously by fax and e-mail.

Fax status in real-time

The user can monitor the status of his faxes in real-time.

Supports All Exchange Versions

The new Exchange connector was designed to support automatically current versions of Exchange, old versions, and future versions - there is no need to make any changes to FAXport, when the Exchange server version changes.

No installation required on Exchange server

FAXport Exchange connector does not require any installation on the Exchange server, communication is done via a regular mailbox. There is no need to make any extensions to the active directory scheme.

Through integrating FAXport with e-mail and the most common applications, FAXport becomes a part of everyday activities.

Inbound faxing and Routing

Dialed Number ID (DNIS) and DID support, routes incoming faxes directly to the recipients' desktops. This allows the user to get secure faxes anywhere, anytime, any place, and on any device.

Inbound faxes benefits the user tremendously!

Availability - The fax is never busy.

Immediacy - The fax arrives with no delays.

Convenience - The fax arrives to the user's desktop.

Privacy - Only the recipient sees the fax.

Efficiency - No need to search for lost faxes...

Location Independent - Inbound faxes can be read anywhere - as e-mail.

Savings - No need for paper, toner, special fax lines.

Electronic Archiving - Faxes can be archived as electronic document.

Fax Forward - Faxes can be forwarded as e-mail.

Free Fax Machines - Existing fax machines are less busy.

Uniport Ltd. Experienced Supplier of Universal Messaging Technology to Enterprises

Uniport Ltd. is an experienced, well-established supplier of enterprise fax and universal messaging solutions. Our customers range from large distributed user-base organizations to small workgroups, including government institutions, manufacturing companies, universities, financial institutions as well as service-oriented companies.
