

IP Fax Messaging Software for the Distributed Enterprises

FAXport is a feature-rich technology that provides economical network faxing capabilities and improved productivity.

FAXport for the Distributed Enterprise is a virtual fax over IP network; its architecture offers the distributed organization to benefit from FAXport's capabilities in central and remote sites, yet saving significantly on long distance calls.

The network is built around an LCR (Least Cost Routing) system that provides Intra-company Least Cost Routing and Load Balancing. Building an enterprise wide fax network has never been easier than with the FAXport Remote Server. The FAXport Remote Server allows the branch office to take advantage of high-performance enterprise fax capabilities without investing in a full-price enterprise fax server.

FAXport Benefits the User Tremendously

The FAXport Remote Server allows multi-location, multi-department corporations to leverage the connectivity and resources of the main office's FAXport Enterprise fax server.

The LCR system is a fax routing mechanism that routes the faxes to a gateway from which the transmission to the destination fax will be cheapest.

Agents of the LCR system are installed on every fax node on the network.

Changes in routing rules and network topology are done automatically on each node on the network. The virtual fax network allows remote management of each fax node on the network, traffic monitoring, and provides CDR's (Call Detailed Records) for billing purposes. The virtual network manager has the tools to control the remote Gateways.

Complete Desktop Integration

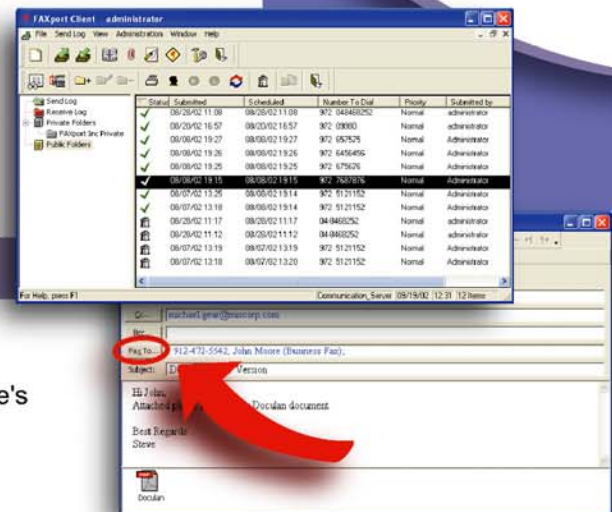

Allows users to send and receive faxes directly from e-mail clients or from Windows applications.

Multi-platform Capability

Enables faxing from Microsoft Exchange, Lotus Notes/Domino, Citrix WinFrame and MetaFrame, and Microsoft Terminal Server, as well as, Windows XP, NT, and 2003 operating systems.

Fax Broadcasting

Fax broadcasting with mail-merge capabilities is easy to use, fast, and efficient.

Through integrating FAXport with e-mail and the most common applications, FAXport becomes a part of everyday activities.
