

IP Fax Messaging Software for Enterprises and Workgroups

For more information please contact your local Rep:

Or look us up at www.faxport.com for a reseller in your area.

Centralized control and friendly user management

Provides full reporting on all incoming and outgoing faxes, including senders, recipients, and fax numbers. Users can track in real time their fax status.

Centralized security and Remote Administration

Integrated with the Corporate LAN security standards, enables administrators to assign users to groups, set access limits to faxes and attachments. Sensitive business transactions may first require approval or be monitored before transmission.

Firewall Friendly

Xport has its own IEEE assigned sockets that lets the user configure the firewall.

APIs for application integration

An extensive set of powerful APIs allow complete integration of fax functionality into almost any Windows or Web-based application.

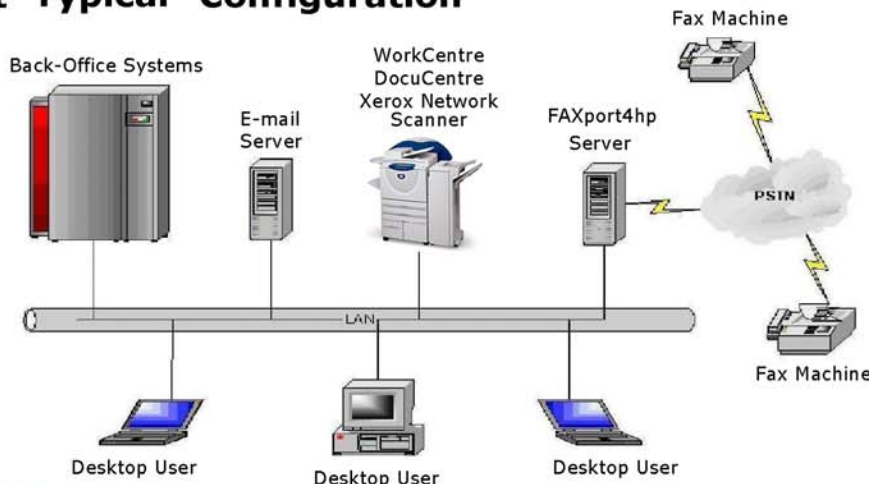

Flexible installation & Intuitive Set-up

Installs to every desktop on the network in a few easy steps. Once the network manager has installed the Xport server and Gateway, the users then click on the icon that automatically installs the client software on their desktop.
