

Inbound Fax Routing

10 reasons why you should use inbound fax routing.

1. **Availability** - The fax is never busy.
2. **Immediacy** - The fax arrives with no delays.
3. **Convenience** - The fax arrives to the user's desktop.
4. **Privacy** - Only the recipient sees the fax.
5. **Efficiency** - No need to search for lost faxes...
6. **Location Independent** - Inbound faxes can be read anywhere – as e-mail.
7. **Savings** - No need for paper, toner, special fax lines.
8. **Electronic Archiving** - Faxes can be archived as electronic document
9. **Fax Forward** - Faxes can be forwarded as e-mail
10. **Free Fax Machines** - Existing fax machines are less busy.

FAXport supports a variety of flexible routing methods

- ❖ Auto-Routing (DID, DNIS, DDI)
- ❖ CSID (Caller Station Identification)
- ❖ DTMF (Dual Tone Modular Frequency)
