

Automates the Exchange of Mission-Critical Documents

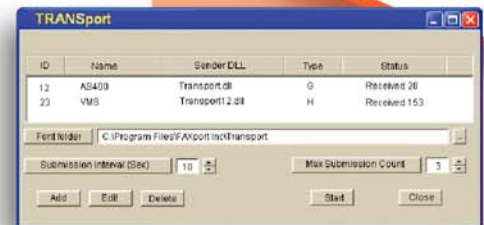

FAXport SAP Connector provides automatic electronic delivery of business critical documents such as invoices, financial statements, purchase orders etc, direct from SAP applications, by Fax & E-mail, eliminating labor intensive operations, saving on printing consumables, and postal services.

FAXport4SAP streamlines your organizations' mission-critical applications by providing an efficient electronic document delivery mechanism.

By implementing FAXport4SAP you gain significant benefits:

- Better response time to suppliers and customers.
- Improved reliability by elimination of inefficient and manual processes.
- Dramatic reduction in document delivery costs.
- Reduction in "Days Sales Outstanding" (DSO), by streamlining business-critical document processing.
- Reduction in the need for stand-alone fax machines.

Streamline your organization with FAXport4SAP

FAXport can be configured as the default output device, with preferred addressing details and notification parameters. Message delivery can be scheduled as a batch process or as a one off to be sent immediately. Messages can be delivered from SAP applications in PCL, PostScript, PDF and RAW text file formats which are automatically converted to the required format by the Server as part of the delivery process.

The SAP Connector routes data to and from FAXport. The Connector includes software licensed from SAP Systems AG "ComServer" which allows the FAXport Server to support the SAP program - to program communication interface and to communicate with SAP via SAPconnect.

This data is then merged with the appropriate form, processed, and sent out via fax, e-mail or SMS.

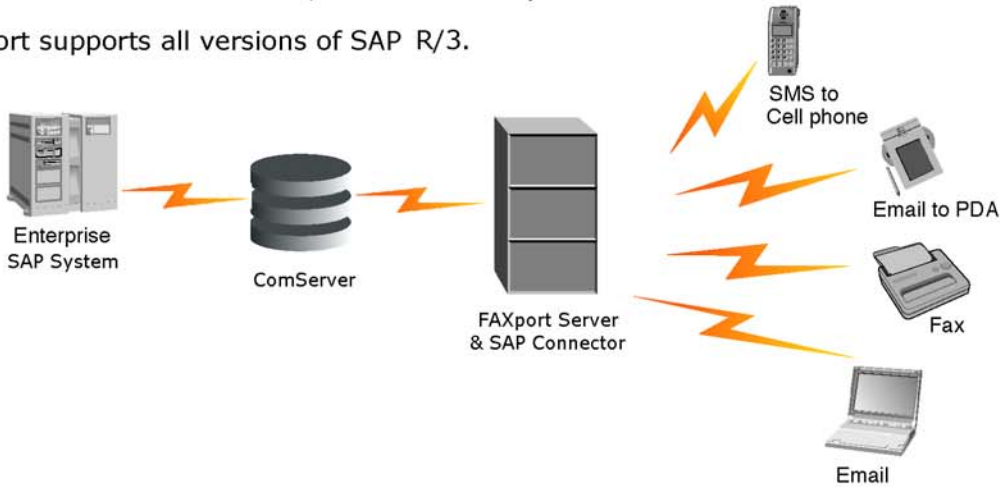

FAXport SAP Connector streamlines the delivery of business critical documents
